

No Wake, For Otters' Sake!

Wildlife and humans can safely enjoy our coastal waters:

- Enter and exit harbors with **no wake**
- Assign **spotters** when possible to watch for wildlife ahead
- Steer **clear of kelp** beds

Watch out for otters
this salmon season!

Going slowly means
better wildlife viewing!

Going fast puts
wildlife at risk!

Sea otter deaths from boat strikes, while unintentional, are easily preventable through increased boater attentiveness.

Thank you for practicing safe boating!
