

ECOSYSTEM MOSAIC CHALLENGE

Sea Otter Awareness Week 2021

HOW TO PARTICIPATE:

1. Print this PDF
2. Use this template to create your own mosaic using: pencils, markers, macaroni, beans, paper, plastics, or even recreate in another form like foods, clay etc.
3. Be creative!
4. Share your work & tag
@seaottersavvy
#ecosystemmosaicchallenge
#SOAW2021 to be featured on our social media.

FUN FACTS:

1. A **mosaic** is something that is made up of many smaller pieces.
2. An **ecosystem** is a community of living organisms in a specific area.
3. **Sea otters** are marine mammals that live along the Pacific coast.
4. Sea otters are a **keystone species** – they have a big impact on other species in their ecosystem.
5. **With sea otters**, there is a healthy ecosystem, made up of many species like a mosaic!
Without sea otters the ecosystem is out of balance and supports fewer species.
